

PLANT CARE

Fresh Cut Blooming

LIGHT

Place in low, indirect sunlight. Avoid direct sun to prevent petal burn.

TEMPERATURE

Keep at room temperature (63-80 F°) away from drafts or vents.

TIPS

Upon arrival, cut approximately 1" from the bottom of stems at a 45 degree angle with a sharp knife or pruners. Remove foliage so that no leaves are underwater. Place in 3-4" of cool water. Flowers that arrive in bud will open in 2-3 days. To prolong life, change water and trim stems every other day.
